ABOUT ME

Aspiring full-stack developer and software engineering student at COMSATS University with a strong foundation in the MERN stack and scalable web architecture. I specialize in building secure, responsive applications using React, Node.js, and MongoDB, with a deep understanding of JWT authentication and SQL database management. Currently expanding my expertise into DevOps (Docker, Kubernetes, and CI/CD) and machine learning to bridge the gap between robust software engineering and intelligent automation. A proactive collaborator proficient in Git/GitHub, dedicated to writing clean, maintainable code and solving complex technical challenges.

WORK EXPERIENCE

- MERN Stack & Front-End Developer – Fiverr, Upwork & LinkedIn – 2019 – Present**
- Developed responsive websites and landing pages using HTML, CSS, JavaScript, React.js, and Next.js.
 - Built and deployed full-stack web applications with MongoDB, Express.js, React.js, and Node.js.
 - Integrated Python frameworks (Flask) and libraries (NumPy, TensorFlow, Seaborn) for data handling and AI/ML solutions.
 - Designed scalable, user-friendly applications with a focus on performance and clean UI/UX.
 - Collaborated with global clients, ensuring timely delivery and custom solutions.
- MERN Stack Developer Internship - 10Pearls Islamabad - 2026 Enrolled**
- MERN Stack Development: Engineered a full-stack Notes Application featuring a dynamic React frontend and a robust Node.js/Express backend for seamless data management.
 - Security & Authentication: Implemented secure user authentication and authorization protocols, utilizing JWT and encrypted password hashing to protect user data.
 - API Integration: Designed and integrated RESTful APIs to handle complex CRUD operations, ensuring high-performance communication between the client and MongoDB.
 - Professional Collaboration: Contributing to agile development cycles at 10Pearls, adhering to industry-standard coding practices and version control using Git.

PROJECTS

Healthcare Management System | React.js, Node.js (2024)

Developed a full-stack healthcare platform facilitating seamless doctor-patient connectivity and emergency blood donor matching. Built secure, role-based portals for doctors to manage schedules and patients to book appointments effortlessly. Leveraged the MERN stack to ensure a responsive, high-performance user experience for critical medical services.

Developed a secure MERN-stack Notes Application at 10Pearls featuring robust user authentication and authorization. I engineered a responsive React frontend and a Node.js backend to handle private data management with encrypted login systems. The project focuses on seamless API integration and high-performance CRUD operations to ensure a professional-grade user experience.

EDUCATION AND TRAINING

18/03/2023–01/01/2027 Abbottabad,Pakistan

BACHELOR OF SCIENCE IN COMPUTER SCIENCE COMSATS University Islamabad, Abbottabad Campus

Place of birth: Pakistan Nationality: Pakistani

18/03/2023–01/01/2027 Abbottabad,Pakistan

BACHELOR OF SCIENCE IN COMPUTER SCIENCE COMSATS University Islamabad, Abbottabad Campus

Field of study Software Engineering Final grade 3.15/4

SKILLS

- Frontend React.js Backend Node.js
 - Next.js | React Native | JavaScript (ES6+) | TypeScript | HTML5 | CSS3 | Tailwind CSS | Redux |
 - Express.js | RESTful APIs | JWT Authentication | MVC Architecture | Error Handling
- Database Management
 - MongoDB | MySQL |
- Cloud Services & Hosting
 - AWS (EC2, S3, Lambda) | Vercel | Netlify |
- Software Testing & QA
 - SonarQube | Unit Testing | Integration Testing | mocha |
- DevOps & CI/CD
 - Docker | Github, Github actions | CI/CD Pipelines | Linux (Ubuntu) | Bash Scripting

CERTIFICATES

Salesforce Certified Agentforce Developer | Aug (2025)
